GOODS AND SERVICE | LIFTS

Barron & Shepherd's goods lifts are built as complete self-contained units, reducing on-site cost to a minimum. Factory-tested before despatch—ready for immediate service. They can also be supplied in major sub-assemblies if access to site is restricted. Supplied without sheeting if installed in a brick shaft. Gates of various types can be fitted on any three sides. The illustration shows a lift serving three levels with entry on adjacent sides.
Capacity up to 30 cwt.

Service lifts, operating from waist height, suit libraries, pubs, shops and restaurants.
Capacity up to 3 cwt.

MASONRY BLOCK

The Bradstone Masonry Block ensures that the aesthetic random rubble finish will be preserved for all time even though traditional stonemasonry is a vanishing art. Each block incorporates a number of irregular natural shaped stone facsimiles separated by false joints. When these are pointed together with the construction joints the effect achieved is completely realistic rather than the geometrical appearance of most reconstructed stone.

COURSED CHISEL DRESSED

Yet another new dimension in reconstructed stone. The roughly dressed finish and slightly irregular arrises give Bradstone Coursed Chisel Dressed a completely natural appearance.
